

IATF 16949:2016 Internal Auditor Training

DURATION
2 Days

FORMAT
Trainer-led

AUDIENCE
Automotive

STANDARDS
IATF 16949:2016

BACKGROUND

Effective internal auditing is an important part of maintaining and improving an automotive Quality Management System. This course provides participants with an understanding of IATF 16949:2016 requirements alongside the knowledge and practical techniques needed to plan, conduct and report internal audits that assess both conformity and the effectiveness of organisational processes.

The course explores the structure and key requirements of IATF 16949:2016, Customer-Specific Requirements, automotive Core Tools and the process approach before progressing into practical auditing. Participants consider auditing principles, auditor responsibilities, objective evidence, questioning and verification techniques, audit findings and nonconformities, before applying these principles through group activities and a practical auditing exercise.

LEARNING OBJECTIVES

By the end of this course, participants will be able to:

- Explain the structure and key requirements of IATF 16949:2016.
- Identify applicable Customer-Specific Requirements within an automotive QMS.
- Describe the process approach and its application to internal auditing.
- Explain key auditing principles and the responsibilities of an internal auditor.
- Apply appropriate techniques to gather and verify objective audit evidence.
- Conduct and report an internal audit using a structured auditing approach.
